Michał Zeprzałka

About me

I have **15 years of experience** designing and delivering innovative web and multimedia solutions. I pair technical skill with a designer's eye — the digital products I build are meant to work well and look right.

I specialise in design systems, websites, AI integrations and scalable applications. I have long-standing experience in graphic design, animation and video production. For many years I taught at universities, **earning the Rector's Award** for the highest average score in student surveys: 99.28%.
